MASTER IN ASTROPHYSICS AND SPACE SCIENCE

УНИВЕРЗИТЕТ У БЕОГРАДУ
UNIVERSITY OF BELGRADE

Nuclear Starburst Disks

Active Galactic Nuclei

Fritz Ali Agildere

April 29, 2026

Description

Description

- $10^{42-43}\,\mathrm{erg\,s^{-1}}$ Peak Luminosities

Description

- $10^{42-43}\,\mathrm{erg\,s^{-1}}$ Peak Luminosities
- Soft X-Ray Spectrum Without Hard Coronal X-Rays

Description

- $10^{42-43}\,\mathrm{erg\,s^{-1}}$ Peak Luminosities
- Soft X-Ray Spectrum Without Hard Coronal X-Rays
- Hours/Days Recurrence Times

Description

- $10^{42-43}\,\mathrm{erg\,s^{-1}}$ Peak Luminosities
- Soft X-Ray Spectrum Without Hard Coronal X-Rays
- Hours/Days Recurrence Times
- $kT \sim 50-80\,\mathrm{eV}$ Accretion Disk Quiescent Emission

Description

- $10^{42-43}\,\mathrm{erg\,s^{-1}}$ Peak Luminosities
- Soft X-Ray Spectrum Without Hard Coronal X-Rays
- Hours/Days Recurrence Times
- $kT \sim 50 - 80\,\mathrm{eV}$ Accretion Disk Quiescent Emission
- $kT \sim 100 - 250\,\mathrm{eV}$ Thermal Like Flares

Description

- $10^{42-43}\,\mathrm{erg\,s^{-1}}$ Peak Luminosities
- Soft X-Ray Spectrum Without Hard Coronal X-Rays
- Hours/Days Recurrence Times
- $kT \sim 50 - 80\,\mathrm{eV}$ Accretion Disk Quiescent Emission
- $kT \sim 100 - 250\,\mathrm{eV}$ Thermal Like Flares
- Expanding Emitting Region Temperature Hysteresis

Description

- $10^{42-43}\,\mathrm{erg\,s^{-1}}$ Peak Luminosities
- Soft X-Ray Spectrum Without Hard Coronal X-Rays
- Hours/Days Recurrence Times
- $kT \sim 50 - 80\,\mathrm{eV}$ Accretion Disk Quiescent Emission
- $kT \sim 100 - 250\,\mathrm{eV}$ Thermal Like Flares
- Expanding Emitting Region Temperature Hysteresis
- Sometimes Regular Double Pattern

Description

- 10^{42-43} erg s^{-1} Peak Luminosities
- Soft X-Ray Spectrum Without Hard Coronal X-Rays
- Hours/Days Recurrence Times
- $kT \sim 50 - 80$ eV Accretion Disk Quiescent Emission
- $kT \sim 100 - 250$ eV Thermal Like Flares
- Expanding Emitting Region Temperature Hysteresis
- Sometimes Regular Double Pattern
- $10^{5.5-6.5}\,M_\odot$ Mass Systems

Characteristics

Characteristics

- Strong TDE/CLAGN Connection

Characteristics

- Strong TDE/CLAGN Connection
- Post Starburst Galaxy Overrepresentation

Characteristics

- Strong TDE/CLAGN Connection
- Post Starburst Galaxy Overrepresentation
- Missing Optical Broad Lines (No BLR)

Characteristics

- Strong TDE/CLAGN Connection
- Post Starburst Galaxy Overrepresentation
- Missing Optical Broad Lines (No BLR)
- Narrow Lines Present (Past AGN Like Activity)

Characteristics

- Strong TDE/CLAGN Connection
- Post Starburst Galaxy Overrepresentation
- Missing Optical Broad Lines (No BLR)
- Narrow Lines Present (Past AGN Like Activity)
- Extended Emission Line Regions (Short Lived SMBH Flare Ionization)

Mechanisms

Mechanisms

- Disk Instabilities

Mechanisms

- Disk Instabilities
  - Accretion Flow Ring Oscillation (Stable/Unstable Mode Cooling/Heating)

Mechanisms

- Disk Instabilities
  - Accretion Flow Ring Oscillation (Stable/Unstable Mode Cooling/Heating)
  - Warped Accretion Disks (Below Viscous Timescale Discrete Ring Breakup)

Mechanisms

- Disk Instabilities
  - Accretion Flow Ring Oscillation (Stable/Unstable Mode Cooling/Heating)
  - Warped Accretion Disks (Below Viscous Timescale Discrete Ring Breakup)
- Orbiter Interactions

Mechanisms

- Disk Instabilities
  - Accretion Flow Ring Oscillation (Stable/Unstable Mode Cooling/Heating)
  - Warped Accretion Disks (Below Viscous Timescale Discrete Ring Breakup)
- Orbiter Interactions
  - Repeating Partial Tidal Disruptions (pTDEs)

Mechanisms

- Disk Instabilities
  - Accretion Flow Ring Oscillation (Stable/Unstable Mode Cooling/Heating)
  - Warped Accretion Disks (Below Viscous Timescale Discrete Ring Breakup)
- Orbiter Interactions
  - Repeating Partial Tidal Disruptions (pTDEs)
  - Roche Lobe Overflow ($\varepsilon \ll 1$ MS Star)

Mechanisms

- Disk Instabilities
  - Accretion Flow Ring Oscillation (Stable/Unstable Mode Cooling/Heating)
  - Warped Accretion Disks (Below Viscous Timescale Discrete Ring Breakup)
- Orbiter Interactions
  - Repeating Partial Tidal Disruptions (pTDEs)
  - Roche Lobe Overflow ($\varepsilon \ll 1$ MS Star)
  - Extreme Mass Ratio Inspiral (SMO/BH EMRI)
